Description:

BRK PRC700VB (model PC1200V) is a battery operated single station photoelectric smoke and carbon monoxide combination alarm specifically designed for residential and institutional applications including sleeping rooms of hospitals, hotels, motels, dormitories, and other multifamily dwellings as defined in standard NFPA 101. BRK PRC700VB has been fully tested and complies with UL217, UL2034, CSFM, NFPA 72, NFPA 720, NFPA 101 and other agencies that model their codes after the above agencies. It meets building codes where battery operated photoelectric smoke and carbon monoxide combination alarms with voice are required and with model building codes published by the ICC.

BRK PRC700VB is a state of the art smoke and CO combination alarm designed to provide early warning of a fire or carbon monoxide danger. It features a photoelectric smoke sensing chamber, an electrochemical CO sensor and “Voice Warning with Location”. This exclusive feature incorporates a voice that will speak one of 11 pre-programmed locations and the danger detected. When the alarm sounds (if programmed for “basement”, for example) it will speak “Warning, evacuate, smoke in basement”. It features a Sweeping Horn Tone that has a lower and varying frequency that makes it easier for the elderly with normal age related hearing loss to hear the horn. Two AA alkaline batteries power supply, 10 Year CO sensor, 10 Year End of Life feature and single button test/silence. This alarm has two silence features. Low Battery Silence: Temporarily silence the low battery chirp for up to eight hours. Alarm Silence: Silence alarm for several minutes. It also features a tamper resistant locking pin that locks the alarm to the mounting bracket to prevent removal of batteries or alarm. Designed for wall or ceiling mounting. Includes mounting anchors and screws.

LOW PROFILE DESIGN
Sleek, contemporary design blends into any décor.

VOICE WARNING WITH LOCATION
Exclusive! A voice will tell you the programmed location of the unit and danger detected.

ELECTROCHEMICAL CO SENSOR
Most accurate technology available for detecting carbon monoxide as compared to other sensing technologies.

PHOTOELECTRIC
Photoelectric technology is generally more sensitive at detecting large particles, which tend to be produced in greater amounts by smoldering fires.

10 YEAR END OF LIFE
10 Year CO Sensor and end of life. Provides audible notice when alarm needs to be replaced. (Note: Batteries do not last 10 years and are not tamper proof. Use PRC710VB for these features.)

SILENCE FEATURE
Silences nuisance alarms.
The smoke and CO combination alarm shall be a BRK Model PC1200V (cat. no. PRC700VB) and shall provide at a minimum the following features and functions:
1. A Photoelectric smoke sensing chamber and an electrochemical CO sensor.
2. The unit shall have an “10 Year End of Life” signal. This signal should be capable of temporarily being silenced for up to 2 days. After about 2 days, the signal will resume. After about 2-3 weeks the signal cannot be silenced.
3. Fully screened smoke sensing chamber to resist entry of small insects thereby reducing the probability of unwanted alarms and be capable of self restoring.
4. Powered by replaceable 2 AA alkaline batteries and a solid state speaker horn rated at 85dB at 10 ft.
5. A visual LED power-on indicator to confirm unit is receiving power or is alarm.
6. A full function test button should check all alarm functions by simulating a smoke and CO condition, causing the unit to alarm.
8. Tamper resistant locking pin that locks alarm to mounting bracket to prevent removal of batteries.
9. The unit shall be capable of operating between 40°F (4°C) and 100°F (38°C) and relative humidity between 10% and 95%.
10. The unit shall contain mounting hardware and shall be listed for wall or ceiling mounting.
11. The unit shall at a minimum meet the requirements of UL217, UL2034, CSFM, NFPA 72, NFPA 720, NFPA 101, ICC

**Installation of Alarm**
Installation of this alarm must conform to NFPA 72 and 720. Always check your local building codes. Follow all instructions for placement as outlined in the user’s manual in sections titled “Recommended Locations for Smoke Alarms” and “Locations to Avoid for Smoke Alarms.”

**The Parts of this Alarm**
1. Test/Silence button
2. LED alarm light
3. Install AA batteries here
4. Locking tab slot (Break out Tab)
5. Mounting bracket
6. Mounting Slots
7. Horn

**Technical Specs**
- **Alarm Dimensions:** 5.7” Dia. x 1.28” H
- **Weight:** 7.6 oz
- **Operating Voltage:** 3V Battery Powered (2 AA Alkaline)
- **Temperature Range:** 40°F (4°C) to 100°F (38°C)
- **Humidity Range:** 10% to 95% relative humidity (RH)
- **Audio Alarm:** 85dB at 10 feet
- **Test/Silence:** Electronically simulates smoke and CO conditions, causing the unit to alarm. Press and hold test/silence button.
- **Alarm Reset:** Automatic when smoke clears
- **Smoke Sensor:** Photoelectric
- **CO Sensor:** Electrochemical
- **DC Power:** Intermitent Green LED
- **Local Alarm:** Audio alarm and rapidly flashing Red LED
- **Listing:** Listed to UL217 and UL2034 Standards

**Shipping Specs**
- **Individual Carton Dimensions:** 5.75” L x 1.38” D x 5.75” H
- **Weight:** 0.58 lbs.
- **Cube:** 0.03 ft³
- **UPC:** 0 29054 01498 6
- **Master Carton Dimensions:** 8.88” L x 6.06” W x 6.31” H
- **Master Pack:** 6
- **Weight:** 3.8 lbs.
- **Cube:** 0.20 ft³
- **I2of5:** 600 29054 01498 8
- **Cases per Layer:** 32
- **Number of Layers:** 8
- **Cases per Pallet:** 256
- **Units per Pallet:** 1,536
- **Cube:** 55.8 ft³
- **Weight:** 1,044 lbs.
