**INSTALLATION**

WHERE TO INSTALL THIS ALARM

Mounts across the ceiling. In recommended locations, the Smoke/CO Alarm may be visible to everyone in the room via the Color Indicator Ring. In some cases, depending on the sensor type, the Smoke/CO Alarm may be placed on the wall. (See **Wall Mounting, page 12**)

Note: The installer recommends installing the Smoke/CO Alarm(s) as high on the ceiling as possible. For example, at least 6 feet up on the ceiling, as high as possible. The installer recommends using a spirit level to verify that the Smoke/CO Alarm is flush with the ceiling surface, prior to placing a battery into the unit.

**WARNING**

Do not block the side of Smoke/CO Alarm(s) with any material or make any modifications to these units. The Color Indicator Ring may be a window to the inside of the alarm.
WHAT YOU NEED TO KNOW ABOUT CO

CO is odorless, colorless, and tasteless gas produced when fossil fuels (like gas, oil, and wood) are burned. It is a byproduct of incomplete combustion. In homes, CO is mostly produced by gas stoves, furnaces, or water heaters.

SYMPTOMS OF CO POISONING

Symptoms can be mild to severe and can range from headaches and dizziness to unconsciousness and death. Symptoms can include:

- Headache
- Dizziness
- Nausea
- Vomiting
- Fatigue
- Chest pain
- Difficulty breathing

CO poisoning is often mistaken for other illnesses because the symptoms are similar to those of the flu, alcohol intoxication, or other conditions.

RECOMMENDED LOCATIONS FOR SMOKE/CO ALARMS

According to Underwriters Laboratories Inc. UL2034, Section 1.2.2, the Smoke and Carbon Monoxide Alarm should be installed in the living area(s) of a residential board and care occupancy (RBCO). An RBCO is defined as "households".

- In the living area(s) of a residential board and care occupancy (RBCO)

REGULATORY INFORMATION FOR SMOKE/CO ALARMS

As a user of a Smoke/CO Alarm, you have the responsibility to follow the instructions provided by the manufacturer to ensure the proper functioning of the device.

- Install and maintain the Smoke/CO Alarm according to the manufacturer's instructions.
- Test the Smoke/CO Alarm regularly, at least once a month.
- Replace the batteries or use a battery-powered alarm as recommended by the manufacturer.

FINDING THE SOURCE OF CO AFTER AN ALARM

If you detect the smell of CO in your home, it is important to find the source of the gas to prevent further exposure. Here are some steps to take:

1. Open all windows and doors to ventilate the area.
2. Turn off any gas appliances and turn off the power to the area where the CO is detected.
3. Call your local fire department or emergency services.

ABORT SMOKE ALARMS

Battery (DC) powered Smoke Alarms are designed to work on either a battery or AC power. To switch from battery to AC power, do not unplug the alarm or remove the batteries until you get AC power. You may damage the alarm and void the warranty.

- To use AC power, plug the alarm into an electrical outlet with a ground connection.
- If AC power is not available, replace the batteries as soon as possible.

THE SMOKE/CO ALARM

This Smoke/CO Alarm has a limited life. If you have questions that cannot be answered by reading this manual, call our Customer Service Team at 1-800-323-9005.

LIMITED WARRANTY

BRK Brands, Inc., (“BRK”) the maker of First Alert® brand products, warrants to the original retail consumer purchaser of this product that it will be free from defects in material and workmanship for a period of five (5) years from the date of original retail purchase. This warranty does not apply to any of the following: negligent use or misuse of the product, products that have been altered, modified, or used in other than normal and customary manners, products that have been damaged by mishandling, accident, or natural disasters, products that have been repaired or serviced by anyone other than BRK or an authorized service center.
